

7092 PROOF Mercury EL

Certified self-loading stretcher

FEATURES

Mercury EL is the newest entry in Me.Ber's range of ambulance cots. Sharing many features from other Mercury models, the EL is a naturally highly reliable and versatile cot. This model represents the entry level for the Mercury line.

Unlike most Mercury models, the EL does not feature a foldable front trolley nor 4 swivel castors and it's not multilevel. However, this version serves as a **perfect solution** when a high standard of quality must be met while keeping things **easy and accessible**.

Safe-Frame Technology:

The frame of an ambulance cot must withstand intense mechanical stress: this is why Mercury features a single-piece frame, in line with Me.Ber.'s Same Frame building philosophy.

Thanks to this expedient, the structure of the cot is extremely safe and robust through time.

Device certified according to the European harmonized safety standards UNI EN 1865 - UNI EN 1789.
